CODIGO

The image shows a developer's environment with two main windows: a code editor and a web browser.

Code Editor (VS Code): The left window displays the file `cambiaColor.php`. The code is a simple HTML page with a script that changes the background color of a heading based on button clicks:

```
<!DOCTYPE html>
<html lang="es">
<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Actividad 4</title>
</head>
<body>
    <h1 id="samu">soy una simple pagina!!! :V</h1>
    <button id="btnrojo" style="background-color: red;" onclick="rojo()">Red</button>
    <button id="btnazul" style="background-color: blue;" onclick="azul()">Blue</button>
    <button id="btnverde" style="background-color: green;" onclick="verde()">Green</button>
</body>
</html>
```

GitHub Profile (Browser): The right window shows the GitHub profile of the user "Caradan1". The profile includes a bio placeholder, a status update field, and a link to edit the profile. It also shows the user joined 28 days ago and lists one repository: "Desarrollo-web-", which is a public CSS repository. A contribution calendar for the last year is visible at the bottom.
